Product Description

Introduction of High Purity Corundum Refractory Brick For Industrial Furnace And Kiln

Corundum Brick is a kind of refractory product with corundum as the main crystal phase and contains over 90% aluminium oxide content. Corundum fire bricks have very high cold crushing strength that can reach up to 340MPa and high apparent initial softening temperature that is over 1700. Corundum refractory brick can be used in blast furnace, hot blast stove, glass furnace and etc.

- Properties of High Purity Corundum Brick
 * High temperature resistance;
 * High compression strength;
 * High dense structure;
 * Good thermal shock resistance;
 * Strong resistance to acid and alkaline slag erosion;
 * Good chemical stability;
 * Good resistance to metal and glass liquid;
