

High Temperature Refractory Castable Concrete High Alumina Castable **Refractory Powder**

packed on wooden pallets, with water-proof cover, and tightened with plastic/steel

Basic Information • Place of Origin: Zhengzhou ,China • Brand Name: Rongsheng Xinwei • Certification: ISO9001 Model Number: M-95, DM-90

200-800USD

bandages 20-30DAYS

- Minimum Order Quantity: 1 Ton
- Price:
- Packaging Details:
- Delivery Time:
- Payment Terms: TT; L/C 2000tons /month
- Supply Ability:

Product Specification

Cost:	Low
 Density: 	High
 Durability: 	High
 Installation: 	Easy
 Maintenance: 	Low
 Material: 	Refractory Castable
 Refractoriness: 	High
 Resistance To Abrasion: 	High
 Resistance To Chemical Attack: 	High
Resistance To Corrosion:	High
 Resistance To Heat: 	High
Strength:	High
 Thermal Conductivity: 	Low
Thermal Shock Resistance:	: High

Product Description

Description of High Temperature High Alumina Refractory Castable Powder For Steel Industry High alumina refractory castable is a versatile and heat-resistant material commonly used in various industrial applications. It is composed of carefully selected high-quality raw materials, primarily alumina, and features a low cement content to enhance its performance in extreme temperature conditions.

This specialized castable offers outstanding thermal resistance, making it ideal for use in applications such as furnaces, kilns, incinerators, and other high-temperature environments. Its excellent erosion and abrasion resistance further contribute to its longevity and reliability in harsh operating conditions.

High alumina refractory castable is known for its ease of installation and rapid setting, which helps reduce downtime and improve overall operational efficiency. It can be customized to achieve specific densities and strengths, ensuring it meets the unique requirements of various industrial processes.

Rongsheng supplying a comprehensive range of CASTABLE, include: 1. Conventional Castable

Normal strength castable suitable for general casting ,high mechanical and abrasive resistance

20

Extra strength castable excellent for high mechanical strength

Thermal shock resistance castable (coarse grain castable) high mechanical strength and thermal shock resistance Light weight castable casting in the areas that need to be protected from heat losses

2.High Alumina low cement castable

Normal low cement castable high mechanical strength low shringkage abrasive resistance and good thermal shock resistance

The Main Application For High Alumina Refractory Castable Are Listed Below : Casting an alternative to fireclay and high alumina brick for application such as glass furnaces , EAF , reheating-furnace, tapping spout, aluminium and jewelry kiln.

Application for cyclone preheated of cement kiln, ceramic kiln , ash coal hoppers coal and incinerators Casting an alternative to high a alumina brick at EAF roof core , burner block , nose ring and kiln load

Parameters of High Alumina Refractory Castable

Item			M-95	
Chem.comp≥	MgO		95	
	Cr2O3		2.0	
3D g/cm3z			2.80	
110* strength of drying(MPa)z			40	
1300*C strength after bunning(MPa)2			40	
1600C strength after bumning(MPa)>			40	
APP:Used for steel open hearth furnace foor filing material, manding of coverter and fling
