High Alumina Refractory Brick Aluminum Oxide Fire Brick For Blast Furnace **And Electric Furnace**

Basic Information

• Place of Origin: Zhengzhou ,China • Brand Name: Rongsheng Xinwei

 Certification: ISO9001

LZ-48, LZ-55, LZ-65, LZ-70, LZ-75, LZ-80 Model Number:

Minimum Order Quantity: 1 Ton

Price: 200-800USD

 Packaging Details: packed on wooden pallets, with water-proof cover, and tightened with plastic/steel

bandages

• Delivery Time: 20-30DAYS TT; L/C • Payment Terms: • Supply Ability: 2000tons /month

Product Specification

 Al2O3 Content: >48% Application Temperature: ≤1400 Bulk Density: 2.2-3.2g/cm3 • Cold Crushing Strength: 40-100MPa

White/Gray/Brown/Black/Yellow/Green/Blue/F

Density: 2.2-3.2g/cm3 Fe2O3 Content: ≤3.5%

High Alumina Refractory Brick Material:

Porosity: <20% Refractoriness: >1700 Refractoriness Under Load: ≥1400

Shape: Square/Rectangle/Circle/Arch/Customized

SiO2 Content: ≤40% Size: Customized • Thermal Shock Resistance: Good

Product Description

Product Description of High Alumina Refractory Brick Aluminum Oxide Fire Brick For Blast Furnace And Electric Furnace

High alumina brick is a kind of neutral refractory with alumina content above 48%. It is formed by shaping and calcining bauxite or other raw materials with high alumina content. High thermal stability and fire resistance above 1770.

The production process of high alumina bricks is similar to that of multi clinker clay bricks. The difference is that the proportion of clinker in the ingredients is high, up to 90~95%. Before crushing, the clinker needs to be sorted and screened to remove iron. The firing temperature is high. For example, when high alumina bricks such as I and II are fired in tunnel kilns, it is generally 1500~1600

Feature of high alumina bricks

- 1. Good thermal conductivity.
- 2. High fire resistance.
 3. Good slag resistance, acid and alkali resistance.
 4. Thermal stability.

Appliaction Of High Alumina Refractory Brick Aluminum Oxide Fire Brick For Blast Furnace And Electric Furnace

As a basic material in the field of high-temperature technology, high alumina bricks are widely used in cement, glass building materials, steel smelting, petrochemical and other industries. High temperature industrial furnaces for high alumina bricks include blast furnace, hot blast furnace, electric furnace, blast furnace, reverberatory furnace and rotary kiln lining. In addition, high alumina bricks can also be processed into open hearth regenerative grid bricks, socket bricks for pouring system, nozzle bricks, etc. according to the requirements of industrial furnaces.

Product Specification of aluminum oxide fire alumina brick high alumina content furnaces bricks

Item		Specification
