High Alumina Refractory Brick With High Temperature Strength Fire brick For Blast Furnace And Rotary Kiln Lining

Basic Information

Place of Origin: Zhengzhou ,ChinaBrand Name: Rongsheng Xinwei

• Certification: ISO9001

• Model Number: RS-48, RS-55, RS-65, RS-75, RS-80

Minimum Order Quantity: 1 TonPrice: 200-800USD

• Packaging Details: packed on wooden pallets, with water-proof

cover, and tightened with plastic/steel

bandages 20-30DAYS TT; L/C

• Supply Ability: 2000tons /month

Product Specification

Delivery Time:Payment Terms:

Alumina Content: High
Bulk Density: High
Chemical Stability: High
Color: Red
Compressive Strength: High
Density: High

Material: High Alumina Refractory Brick

Porosity: Low
Refractoriness: High
Refractoriness Under Load: High
Shape: Brick
Softening Temperature: High
Thermal Conductivity: Low
Thermal Shock Resistance: High

Product Description

Product Description of High Alumina Refractory Brick With High Temperature Strength Fire brick For Blast Furnace And Rotary Kiln Lining
High alumina brick is a kind of alumina-silicate refractory material with content of alumina oxide more than 48%. It is calcined

High alumina brick is a kind of alumina-silicate refractory material with content of alumina oxide more than 48%. It is calcined and formed by the raw material of banxite or the material with high content of AL2O3. High thermal stability, the refractoriness is more than 1770. Good slag resistance, used for the liner of masonry steel-making electric stove, glass furnace and cement revolver.

Features of High Alumina Refractory Brick With High Temperature Strength

- 1. High refractoriness;
- 2. High temperature strength;

- 3. High thermal stability;
 4. Neutral refractory;
 5. Good resistance to acid and basic slag corrosion;
- 6. High refractoriness under load;
- 7. High temperature creep resistance; 8. Low apparent porosity;

Product Application of High Alumina Refractory Brick For Blast Furnace And Rotary Kiln Lining

As a basic material in the field of high-temperature technology, high alumina bricks are widely used in cement, glass building materials, steel smelting, petrochemical and other industries. High temperature industrial furnaces for high alumina bricks include blast furnace, hot blast furnace, electric furnace, blast furnace, reverberatory furnace and rotary kiln lining. In addition, high alumina bricks can also be processed into open hearth regenerative grid bricks, socket bricks for pouring system, nozzle bricks, etc. according to the requirements of industrial furnaces.

Product Parameter of High Alumina Refractory Brick

Item		Properties			
		RS-80	RS-75	RS-65	RS-55
Al2O3 (%)		80	≥75	≥65	≥55
Refractoriness (°C)		≥1790	≥1790	≥1790	≥177(
Bulk density (g/cm3)		2.65	2.5	2.45	2.4
Softening temperature under load (°C)		1530	≥1520	≥1500	≥147(
Linear changes on reheating (%)	1500°CX2H	0.1	0.1	0.1	0.1
		-0.4	-0.4	-0.4	-0.4
	1450°CX2H				
Apparent porosity (%)		22	≤23	≤23	≤22
Cold crushing strength (Mpa)		55	≥50	≥45	≥40
