# **Rongsheng Factory Premium Fused Magnesia For** Steelmaking

### Basic Information

• Place of Origin: Zhengzhou, China • Brand Name: Rongsheng Xinwei

• Certification:

LFM 99, LFM98.5, LFM 98A, LFM 98B, LFM Model Number:

97A, LFM 97B

1 Ton Minimum Order Quantity: • Price: 200-800USD

Packed on wooden pallets, with water-proof cover, and tightened with plastic/steel Packaging Details:

bandages

• Delivery Time: 10-20 Days • Payment Terms: TT; L/C • Supply Ability: 2000tons /month

## **Product Specification**

• Highlight: Fused Magnesia, Premium Fused Magnesia,

Steelmaking Fused Magnesia

### **Product Description**

#### Product Overview of Rongsheng Factory Premium Fused Magnesia At Competitive Prices For Steelmaking

Rongsheng Refractory provides a broad selection of premium magnesium oxide raw materials. Fused Magnesia (Standard Grade) is produced by melting top-grade magnesite in an electric arc furnace, resulting in a product with large crystals, a dense structure, and strong resistance to corrosion. With an MgO content ranging from 87% to 98%, this exceptional basic refractory material features coarse particles and a porous structure, delivering excellent airflow and slag resistance. Fused magnesia is commonly used to create refractory products such as sintered bricks, molds for foundries, and furnace linings.

### Key Features of Fused Magnesia From Rongsheng Refractory Factory

High Melting Point: Fused magnesia has an impressive melting point of around 2800°C, ideal for hightemperature applications.

Superior Thermal Conductivity: Its efficient thermal conductivity helps manage heat distribution, reducing overheating and promoting even temperature regulation.

Strong Chemical Resistance: Fused magnesia stands up well against chemical attack from molten metals, slags, and fluxes, ensuring longevity and reliability in demanding environments.

Excellent Abrasion Resistance: Its resistance to wear and tear makes it ideal for high-wear applications, adding durability to refractory systems.

High Sinterability: Fused magnesia can be sintered to form dense, impermeable bricks and shapes, providing effective defense against corrosive and erosive forces.

#### **Applications of High Quality Good Factory Price Fused Magnesia**

Steel Industry Refractories: Widely used in steel furnaces and ladles, fused magnesia protects against the corrosive effects of molten steel and slag.

Cement Kiln Linings: Essential in cement production, it serves as a lining for rotary kilns where raw materials are transformed into clinker.

Glass Production Furnaces: Used in glass furnace linings to shield walls from molten glass corrosion.

Non-Ferrous Metallurgy: Fused magnesia provides a robust lining in non-ferrous metal smelting furnaces, handling high temperatures and harsh chemicals.

Waste Treatment and Incineration: It reinforces incinerator and reactor linings in waste management facilities, ensuring equipment durability under high heat and corrosive conditions.

**Product Specification of Good Factory Price Fused Magnesia** 

	The physical and chemical properties of Large Crystal Fused Magnesia (LFM)								
Product Code	Chemical Composition (Mass Fraction),%							Particle Bulk Densit	
	MgO≥	SiO2≤	CaO≤	Fe2O3≤	Al2O3≤	Burn Loss	] '	a ticle balk bensit	
LFM 99	99.00	0.30	0.60	0.35	0.10	0.08		≥3.51	
LFM 98.5	98.30	0.40	0.80	0.45	0.12	0.08		≥3.50
