

Sillimanite Refractory Bricks For Furnace With Good Resistance To Spalling Residual Quartz $\leq 1.0\%$

Our Product Introduction

for more products please visit us on bricksrefractory.com

Basic Information

- Place of Origin: Zhengzhou ,China
- Brand Name: Rongsheng Xinwei
- Certification: ISO9001
- Model Number: Rongsheng
- Minimum Order Quantity: 1 Ton
- Price: 200-800USD
- Packaging Details: packed on wooden pallets, with water-proof cover, and tightened with plastic/steel bandages
- Delivery Time: 20-30DAYS
- Payment Terms: TT; L/C
- Supply Ability: 2000tons /month

Product Specification

- Features: High Working Temperature
- Permanent Linear Change: Low
- Modle Number: As Required
- Porosity: High, Medium, Low
- Refractoriness Under Load: 1300
- Volume Density: $\geq 2.20\text{g/cm}^3$
- Resistance To Spalling: Good
- Apparent Porosity: 16%
- Highlight: **Sillimanite Refractory Bricks For Furnace, Resistance To Spalling Sillimanite Refractory Bricks**
Residual Quartz $\leq 1.0\%$ Sillimanite Refractory

Product Description

Product Description:

Our Furnace Refractory Bricks are made from high-grade materials, including Sillimanite, which is known for its excellent refractory properties. These bricks are available in the Standard Straight Shape, making them easy to install, with no special equipment required.

As a type of Sillimanite Refractory Brick, these furnace bricks have a high service temperature, making them suitable for use in extreme heat conditions. They are designed to provide exceptional thermal insulation, ensuring that the heat is retained within the furnace, thus reducing energy consumption and increasing efficiency.

Our Furnace Refractory Bricks are available in a range of models to suit your specific requirements. We can provide you with customized options to ensure that you get the perfect fit for your industrial furnace. Our team of experts will work with you to determine the best model number for your specific needs.

These Sillimanite Refractory Bricks are ideal for use in various industries, including steel, cement, glass, and petrochemicals. They are designed to withstand the harsh conditions of industrial furnaces and can handle high levels of stress and pressure. With their excellent thermal and mechanical properties, these furnace bricks are highly resistant to corrosion, erosion, and chemical attack.

When it comes to the lining of industrial furnaces, our Furnace Refractory Bricks are the perfect solution. They are easy to install, highly durable, and provide exceptional thermal insulation. Our team is committed to providing you with the best quality products and services, ensuring that your industrial furnace is always operating at peak performance.

Features:

Product Name: As Designed Sillimanite Refractory Bricks For Furnace With Good Resistance To Spalling Residual Quartz $\leq 1.0\%$

Product Category: Furnace Refractory Bricks

Application: Furnace Lining

Porosity: High, Medium, Low

Permanent Linear Change: Low

Technical Parameters:

Model Number	As Required
Usage	Lining Of Industrial Furnaces
Shape Type	Standard Straight Shape
Product Category	Furnace Refractory Bricks
Product Name	Rongsheng High Refractoriness Sillimanite Refractory Brick For Glass Kiln
Refractoriness Under Load	1300
Application	Furnace Lining
Features	High Working Temperature
Permanent Linear Change	Low
Apparent Porosity	16%

Applications:

The packaging of these Sillimanite Refractory Bricks is done on wooden pallets, with a water-proof cover, and tightened with plastic/steel bandages. The volume density of these bricks is $\geq 2.20\text{g/cm}^3$, and they have a refractoriness under load of 1300. The weight of these bricks is as designed, and they have an apparent porosity of 16%.

These Sillimanite Refractory Bricks are ideal for use in high-temperature industrial applications. They are commonly used in industries such as metallurgy, building materials, electric power, and chemical engineering. They are also suitable for use in furnaces, kilns, and other high-temperature equipment.

The Sillimanite Brick is a versatile product that can be used in a variety of applications. It is commonly used in the construction of industrial furnaces, as it can withstand high temperatures without cracking or breaking. It is also used in the production of glass and ceramics, as it can provide thermal insulation and prevent heat loss.

Rongsheng Xinwei's Sillimanite Refractory Bricks are a reliable and durable product that can be used in a variety of industrial applications. They are designed to withstand high temperatures and provide excellent thermal insulation, making them ideal for use in high-temperature equipment and machinery. If you are in need of high-quality Sillimanite

Bricks, then Rongsheng's Sillimanite Refractory Bricks are an excellent choice.

Support and Services:

Furnace Refractory Bricks Product Technical Support:

Our team of experts is available to provide technical support for our Furnace Refractory Bricks product. We can assist with installation, maintenance, and troubleshooting to ensure optimal performance and longevity.

Furnace Refractory Bricks Services:

We offer a range of services to support our Furnace Refractory Bricks, including:

Custom cutting and shaping to fit specific furnace designs

On-site installation and maintenance services

Training and education for proper handling and usage

Packing and Shipping:

Product Packaging:

Bricks will be packed in wooden crates or pallets for safe transportation.

Each crate or pallet will contain a specified number of bricks as per customer's requirement.

Bricks will be secured with straps to prevent any damage during shipping.

Shipping:

Shipping will be done through reliable carriers to ensure timely delivery.

Customers can choose their preferred shipping method and carrier at the time of placing the order.

The shipping cost will be calculated based on the weight and destination of the order.

Customers will be provided with a tracking number to track the shipment until it reaches its destination.

FAQ:

A: The brand name of the Furnace Refractory Bricks is Rongsheng Xinwei.

Q: What is the model number of the Furnace Refractory Bricks?

A: The model number of the Furnace Refractory Bricks is Rongsheng.

Q: What certification does the Furnace Refractory Bricks have?

A: The Furnace Refractory Bricks have ISO9001 certification.

Q: Where is the place of origin of the Furnace Refractory Bricks?

A: The place of origin of the Furnace Refractory Bricks is Zhengzhou, China.

Q: What is the minimum order quantity for the Furnace Refractory Bricks?

A: The minimum order quantity for the Furnace Refractory Bricks is 1 ton.

Q: What is the price range of the Furnace Refractory Bricks?

A: The price range of the Furnace Refractory Bricks is between 200-800USD.

Q: What are the payment terms for the Furnace Refractory Bricks?

A: The payment terms for the Furnace Refractory Bricks are TT and L/C.

Q: What is the supply ability of the Furnace Refractory Bricks?

A: The supply ability of the Furnace Refractory Bricks is 2000 tons per month.

Q: What is the delivery time for the Furnace Refractory Bricks?

A: The delivery time for the Furnace Refractory Bricks is 20-30 days.

Q: What are the packaging details for the Furnace Refractory Bricks?

A: The Furnace Refractory Bricks are packed on wooden pallets, with a water-proof cover and tightened with plastic/steel bandages.
