Product Description

Description of High Density Fireproof Insulation Ceramic Fiber Blanket Thermal Insulation Blanket

Ceramic fiber blanket is a kind of refractory heat insulation material that is widely used for high temperature heat insulation. Such as Industrial furnace, heating devices, high temperature pipe wall lining. It's environment-friendly material as a replace of asbestos. Also it is with the features of excellent thermal insulation, insulation, fireproof and sound absorption.

The service temperature of a Ceramic fiber blanket can be 1000, 1260, 1360, or 1430. It includes common type, standard type, high purity type, high alumina type, and zirconium-containing type.

Application of Ceramic Fiber Blanket

Industrial building materials kiln, heating device, high-temperature pipe lining; chemical industry high-temperature reaction equipment and heating equipment wall lining; thermal insulation for electric boilers, gas turbines, and nuclear power plants; fire insulation layer for high-rise buildings; furnace door, roof heat insulation; high-temperature filter material and so on.
