

Top-Quality Alkali-Resistant Bricks With High Temperature Resistance For Cement Kilns And For Glass Melting Furnace

Our Product Introduction

for more products please visit us on bricksrefractory.com

Basic Information

- Place of Origin: Zhengzhou ,China
- Brand Name: Rongsheng Xinwei
- Certification: ISO9001
- Model Number: Rongsheng
- Minimum Order Quantity: 1 Ton
- Price: 200-800USD
- Packaging Details: packed on wooden pallets, with water-proof cover, and tightened with plastic/steel bandages
- Delivery Time: 20-30DAYS
- Payment Terms: TT; L/C
- Supply Ability: 2000tons /month

Product Specification

- Packing: Wooden Pallet, Carton, Etc.
- Al₂O₃ Content: ≥42%
- Product Category: Furnace Refractory Bricks
- Temperature Resistance: Up To 1700°C
- Compressive Strength: ≥25MPa
- Reduced Downtime: Yes
- Softening Point: High
- True Density: ≤2.33 G/cm³
- Highlight: **Cement Kilns Alkali Resistant Bricks,
Glass Melting Furnace Alkali Resistant Bricks,
High Temperature Resistance Alkali Resistant Bricks**

Product Description

Product Description of Top-Quality Alkali-Resistant Bricks With High Temperature Resistance For Cement Kilns And For Glass Melting Furnace:

Our Alkali-Resistant Refractory Bricks feature a high heat capacity, ensuring that they can withstand even the most extreme temperatures. With a thermal expansion rate that can be customized to meet your specific needs, our bricks can accommodate high, medium, or low thermal expansion requirements.

One of the key benefits of our Alkali-Resistant Refractory Bricks is that they can help reduce downtime in your industrial processes. Our bricks are designed to be long-lasting and highly resistant to wear and tear, which means that you can count on them to perform reliably even in the most challenging environments.

Our Alkali-Resistant Firebrick is made from high-quality materials, including Al₂O₃ content of at least 42%. This ensures that our bricks are extremely durable and can withstand even the most corrosive and abrasive environments.

In addition, our Alkali-Resistant Refractory Bricks feature a low porosity, which means that they are highly resistant to water and other liquids. This makes them an ideal choice for applications where water or other liquids are present, such as in chemical processing plants or power generation facilities.

At our Alkaline Brick Manufacturer, we are committed to providing our customers with the highest-quality refractory materials available. Our Alkali-Resistant Refractory Bricks are just one example of the innovative and reliable products that we offer. Contact us today to learn more about our products and how we can help you meet your industrial refractory needs.

Features:

Product Name: Top-Quality Alkali-Resistant Bricks With High Temperature Resistance For Cement Kilns And For Glass Melting Furnace

Product Category: Furnace Refractory Bricks

Porosity: Low

Compressive Strength: $\geq 25\text{MPa}$

Cold Crushing Strength: $\geq 60\text{MPa}$

Temperature Resistance: Up To 1700°C

Features: Alkali-Proof Brick, Alkali-Resistant Refractory Bricks, Alkali Resistant Brick

Technical Parameters:

Product Name:	Top-Quality Alkali-Resistant Bricks With High Temperature Resistance For Cement Kilns And For Glass Melting Furnace
Product Category:	Furnace Refractory Bricks
Porosity:	Low
Temperature Resistance:	Up To 1700°C
Compressive Strength:	$\geq 25\text{MPa}$
Al ₂ O ₃ Content:	$\geq 42\%$
Reduced Downtime:	Yes
Heat Capacity:	High
Thermal Expansion:	High, Medium, Low
Use Zone:	Transition Zone

Looking for an Alkali Resistant Brick Lining? Our company is an Alkaline Brick Manufacturer that provides high-quality and durable Furnace Refractory Bricks, including the Industrial-Grade High Quality High-Durability Alkali-Resistant Refractory Bricks For Enhanced Furnace Protection.

Applications:

The Rongsheng Xinwei Alkali-Resistant Refractory Bricks are Alkali Resistant Brick Lining, Alkali-Proof Brick, and Alkali-Resistant Firebrick, which means they are resistant to the corrosive effects of alkali chemicals. This makes them a popular choice for a range of industrial applications, such as in the glass and cement industries.

The bricks have a True Density of $\leq 2.33\text{ G/cm}^3$, which makes them highly durable and resistant to wear and tear. They are ideal for use in the Transition Zone of furnaces, where they can withstand the high temperatures and corrosive environments that are present.

The Rongsheng Xinwei Alkali-Resistant Refractory Bricks come with a range of certifications, including ISO9001, which

ensures that they meet the highest standards of quality. They are manufactured in Zhengzhou, China and can be ordered in quantities as small as 1 Ton. The price range for the bricks is between 200-800USD, making them a cost-effective solution for high-temperature applications.

The bricks are easy to install and come packaged on wooden pallets, with a water-proof cover, and tightened with plastic/steel bandages. They have a supply ability of 2000tons/month, and the delivery time is between 20-30 days.

Support and Services:

Our Alkali-Resistant Refractory Bricks product offers superior technical support and services to ensure that your furnace runs efficiently and effectively. Our team of experts is available to assist with any questions or concerns you may have regarding the installation, maintenance, or performance of our refractory bricks.

We also offer various services to help optimize your furnace's performance, including custom design and fabrication of refractory brick shapes, furnace lining inspections, and installation services. Our goal is to provide comprehensive support to our customers and ensure that their furnaces operate at peak performance for as long as possible.

Packing and Shipping:

Product Packaging: The Alkali-Resistant Refractory Bricks are packed in sturdy wooden crates to ensure safe transportation and storage. Each crate contains a specific number of bricks, depending on the customer's requirements. The crates are labeled with the product name, quantity, and other necessary details for easy identification.

Shipping: The furnace refractory bricks are shipped via reliable and efficient transportation services to ensure timely delivery. We work with trusted carriers to ensure that the product reaches its destination in good condition. The shipping cost is calculated based on the quantity ordered and the destination. We provide all necessary shipping documents and tracking information to our customers.

FAQ:

Q1: What brand are the furnace refractory bricks?

A1: The furnace refractory bricks are made by Rongsheng Xinwei.

Q2: What is the model number of the furnace refractory bricks?

A2: The model number of the furnace refractory bricks is Rongsheng.

Q3: Is there any certification for these furnace refractory bricks?

A3: Yes, these furnace refractory bricks are certified by ISO9001.

Q4: Where are these furnace refractory bricks made?

A4: These furnace refractory bricks are made in Zhengzhou, China.

Q5: What is the minimum order quantity for these furnace refractory bricks?

A5: The minimum order quantity for these furnace refractory bricks is 1 ton.

Q6: What is the price range for these furnace refractory bricks?

A6: The price range for these furnace refractory bricks is between 200-800USD.

Q7: What payment terms are accepted for these furnace refractory bricks?

A7: The accepted payment terms for these furnace refractory bricks are TT and L/C.

Q8: What is the supply ability for these furnace refractory bricks?

A8: The supply ability for these furnace refractory bricks is 2000 tons per month.

Q9: What is the estimated delivery time for these furnace refractory bricks?

A9: The estimated delivery time for these furnace refractory bricks is between 20-30 days.

Q10: How are these furnace refractory bricks packaged?

A10: These furnace refractory bricks are packed on wooden pallets, with water-proof cover, and tightened with plastic/steel bandages.
