### Product Description

#### Product Description of Glass Kiln Fused Chrome Corundum Bricks

Introduce 10%~30%  $\text{Cr}_2\text{O}_3$  into AZS-33. Since  $\text{Cr}_2\text{O}_3$  can color molten glass, it is not suitable for colorless transparent glass, and its foaming index is also suboptimal. However, it is an ideal material for the upper structure of tank furnaces.

Colored glass melting furnaces can use  $\text{Cr}_2\text{O}_3$ -containing fused AZCS bricks for constructing tank walls to enhance corrosion resistance.
