

# High-Performance Best Price Alumina-Magnesia Refractory Castable For **Industrial Kiln And Furnace**

# **Basic Information**

• Place of Origin: Zhengzhou, China • Brand Name: Rongsheng Xinwei Certification: ISO9001 Model Number: Rongsheng • Minimum Order Quantity: 1 Ton • Price: 200-800 USD Packaging Details: Packed on wooden pallets, with water-proof cover, and tightened with plastic/steel bandages 20-30 Days • Delivery Time: • Payment Terms: TT; L/C 2000 tons/month • Supply Ability:

# **Product Specification**

• Highlight:

Industrial Kiln Refractory Castable, High Performance Refractory Castable, Alumina Magnesia Refractory Castable

# **Product Description**

Product Description of High-Performance Best Price Alumina-Magnesia Refractory Castable For Industrial Kiln And Furnace

Our High-Performance Alumina-Magnesia Refractory Castable is engineered to meet the rigorous demands of hightemperature applications in industries such as steel, cement, and non-ferrous metals. This advanced material combines the exceptional properties of alumina and magnesia to deliver outstanding performance, durability, and reliability.

## Key Features of Rongsheng Refractory Best Price Alumina-Magnesia Refractory Castable

Superior Thermal Stability: The refractory castable offers excellent resistance to high temperatures, maintaining structural integrity and performance even in extreme thermal conditions.

Enhanced Corrosion Resistance: The alumina-magnesia composition provides strong resistance against corrosive environments, ensuring a longer service life in furnaces and kilns.

High Mechanical Strength: This castable features high mechanical strength, enabling it to withstand mechanical stress, abrasion, and impact, making it ideal for heavy-duty industrial applications.

Easy Installation and Application: Designed for user convenience, this refractory castable is easy to install and can be applied using standard casting techniques, reducing downtime and labor costs.

### Applications of Alumina-Magnesia Refractory Castable For Industrial Kiln And Furnace

Our Alumina-Magnesia Refractory Castable is suitable for a wide range of high-temperature applications, including but not limited to:

Steelmaking Furnaces: Ideal for lining various zones in steelmaking furnaces, including ladles, converters, and electric arc furnaces, where high temperature and slag resistance are critical. Cement Kilns: Provides superior protection for kiln linings, clinker coolers, and preheaters, offering longevity and resistance to

Cement Kilns: Provides superior protection for kiln linings, clinker coolers, and preheaters, offering longevity and resistance to thermal shock and chemical attack.

Non-Ferrous Metal Smelters: Effective in lining furnaces used in the processing of non-ferrous metals, providing enhanced corrosion resistance and thermal stability.

# Advantages of Rongsheng Alumina-Magnesia Refractory Castable

1.Longevity and Durability: The unique formulation ensures long-lasting performance, reducing the frequency of repairs and replacements, thus lowering maintenance costs.

2. Energy Efficiency: The castable's excellent insulating properties help in reducing heat loss, contributing to significant energy savings in industrial operations.

3.Versatile Use: Suitable for a wide range of industries, this refractory castable offers flexibility and adaptability to meet specific operational needs.

# Technical Specifications of Alumina-Magnesia Refractory Castable

Item		RSPB-90	RSPB-80	RS
Al2o3+Mgo	%	90	80	
Al2o3	%	80	70	
Bulk Density (g/cm3)	110 *24h	2.95	2.65	
Cold Crushing Strength(Mpa)	110 *24h	30	25	
	1600 *3h	50	-	
Modules of rupture(Mpa)	110 *24h	5	0.5	
	1600 *3h	10	-	
Permanent linear change	1600 *3h	+-1.0	+-1.2	-
Application	Wall and bottom impact prefabricated block		Wall and bottom repair	Ladl
