Superior Calcined Bauxite Refractory Raw Materials For Refractory and Abrasive Applications

Basic Information

Place of Origin: Zhengzhou ,ChinaBrand Name: Rongsheng Xinwei

Certification: ISO9001
Model Number: Rongsheng
Minimum Order Quantity: 1 Ton
Price: 200-800USD

Packaging Details: Packed on wooden pallets, with water-proof

cover, and tightened with plastic/steel

bandages

Delivery Time: 10-20 DaysPayment Terms: TT; L/C

• Supply Ability: 2000tons /month

Product Specification

Product Description

Calcined Bauxite is created by heating high-alumina bauxite in rotary, shaft, or round kilns at extremely high temperatures. This calcination process eliminates moisture, resulting in a product with significantly higher alumina content, improved refractoriness, and reduced iron content. Calcined Bauxite also boasts enhanced grain hardness and toughness, making it particularly valuable in applications requiring high thermal stability and resistance to molten slags. Its superior mechanical strength and durability make it an essential raw material in the manufacturing of refractories, abrasives, and other specialized industrial products.
