Product Description

Description of Cement Kiln Firing Zone Anti Peeling High Alumina Refractory Bricks For Precalciner Kiln With High Refractoriness

High alumina brick is a type of refractory brick that is made from materials with a high alumina content (more than 48%). Alumina is a ceramic material with a high melting point and good resistance to heat and corrosion.

Rongsheng Refractory Group supply high quality High Alumina Bricks, which is manufactured to meet the requirements of neutral refractoriness where safe working temperature is more than 1300 degree centigrade. We offer high Alumina Bricks in different specifications as per customer requirements.

Features of High Alumina Bricks

- 1. High alumina bricks has properties of high refractoriness, high strength, acid and washing erosion resistance, good thermal stability and so on.
- 2.. Low bulk density, low thermal conductivity, good thermal insulation performance.
- 3.High compressive strength.
 4. Refractory category allow direct contact of fire, suitable ofr various atmosphere
- 5. Long service life, easy operation.

Applications of High Alumina Bricks

High alumina bricks are widely used in cement, glass building materials, steel smelting, petrochemical and other industries.

- $1. Iron\ \&\ steel\ making\ industry:\ Blast\ furnace, hot\ blast\ stove, electric\ furnace, ladle, tundish, heating\ furnace, refining$
- furnace,reheating furnace,annealing furnace,cupola furnace.

 2.Non-ferrous Metal industry:Smelting furnace,refining furnace,reverberatory furnace,converter furnace.
- 3. Building materials industry: Cement kiln, glass kiln, ceramic kiln, lime kilns, kiln car, tunnel kiln.
- $4. Energy \ \& \ Incineration: Coke \ oven, circulating \ fluidized \ bed \ boiler, carbon \ roasting \ furnace, incinerators.$
- 5.Others:Petrochemical industry furnace.

In addition, high alumina bricks can also be processed into open hearth regenerative grid bricks, socket bricks for pouring system, nozzle bricks, etc. according to the requirements of industrial furnaces.
