### **Product Description**

Description of Hot Sale High Alumina Runner Bricks Fire-resistant High Alumina Refractory Brick For Steel Furnaces High alumina runner bricks are specialized refractory bricks used in the construction of the runners and gates in the steelmaking process, especially in ladles and tundishes. These bricks are designed to withstand the extreme conditions of molten metal and slag, ensuring a smooth flow of metal during the casting process.

We can offer a complete range of runner brick for steel ingot castings composition. In order to meet the specific requirements of each steel plant, we has set up a vast assortment of moulds and is therefore in a position to produce custom-made products or special shapes according to different production requirements.

- 6.Chemical Inertness 7.High Refractoriness 8.Uniform Structure

- 9.Easy Installation
- 10.Customizable Shapes and Sizes

#### Application of High Alumina Runner Bricks

- 1. Steel furnaces;
- Iron making furnaces;
   Glass kiln;
   Ceramic tunnel kiln;
- 5. Cement kiln;
